SUMMARY	I am an aspiring data scientist with a passion to transform raw data into powerful insights. I am highly interested in building predictive analytical models, cleaning data, and visualizing trends to enable smarter decision-making. Fueled by curiosity and equipped with Python, SQL, and strong analytical thinking, I bring a problem-solving mindset to every project. With a solid foundation in statistics and programming, my objective is to make data-driven decisions accessible and impactful. I am always eager to learn, collaborate, and innovate in the world of data		
EDUCATION	Rajalakshmi Institute of Technology , Chennai, India <i>Bachelor of Technology</i> , Artificial Intelligence and Data Science, 2023-2027 CGPA: 8.015		
	Everwin Vidhyashram , Chennai, India <i>CBSE Class 12</i> , 2022-2023 Percentage: 83%		
PROJECTS	AI-based Smart Driving Assistant: Creating an AI-driven driving assistant that identifies road signs through computer vision(YOLOv8). It incorporates real-time conversational AI agents and workflow automation through n8n which offers voice notifications, smart reminders and driver fatigue monitoring.		
	ReSageAI: AI-Enhanced Resume Screening: The AI Resume Screener was created using a methodical, hands-on process that mimics the thinking of a real recruiter, but at a faster, more reliable, and larger scale. Instead of using rigid guidelines or basic keyword searches, we created a system that reads and understands resumes, looks for grammatical structure and even suggests jobs that fit your profile.		
	Crypto Currency Price Prediction Model: Developed a machine learning model to predict cryptocurrency prices using a live dataset. Implemented ARIMA for statistical time series forecasting and LSTM neural networks to capture complex patterns and temporal dependencies in the data.		
SKILLS	Languages: Python, SQL, Java Web Development: HTML, CSS, JavaScript Tools: Visual Studio Code, MySQL, R Studio, PowerBI, Microsoft Excel		
CERTIFICATES	Get started with identities and access using Microsoft Entra Microsoft Applied Skills		22 October, 2025
	MongoDB Basics for Students by MongoDB University		19 June, 2025
	Machine Learning using Python by Simplilearn		26 March, 2025
INTERESTS	Exploring emerging AI technologies, Content creation, Solving real-world problems through AI, Data Visualization, Deep Learning Model Training.		
ACHIEVEMENT	Presented my Research Paper titled "ReSage AI: An AI Enhanced Resume Screening Framework with Intelligent Content Scoring and Suggestive Feedback Mechanism" at ICRTEECT 2025 hosted by Vaagdevi Engineering College, Warangal
